INDEX TO VOLUME 86

January-December 1981

A

Absolute chemical rate 605
Absolute determination of the thermal conductivity of argon at room temperature and pressures up to 68 MPa 293
Absorbed dose standard 495
Adiabatic compressibility 165
Aggregation 383
Air density 27
Alkaline reserve 309
ALOHANET 591
ALOHA system 591
Alternate fuel 655
Ambient temperature 293
Amphoteric latex 571
Application of light scattering to polymers, liquid crystals, and biological systems 571
Argand diagram 661
Argon 293
Automatic computing methods for special functions. Part IV. Complex error function, Fresnel integrals, and other related functions 661

B

Bargmann limits 503
BEBO activation energy 605
Bennett, Herbert S., Upper limits for the number of bound states associated with the Yukawa potential 503
Binary interaction parameters 419
Biomedical thermometry 181
Bomb calorimetry 655
